PROFESSIONAL SUMMARY

AI Full Stack Developer specializing in Generative AI, Agentic AI, and modern web applications. Experienced in building end-to-end AI-powered products using React.js, Next.js, FastAPI, PostgreSQL, LangChain, LangGraph, and OpenAI/Gemini APIs. Skilled in developing responsive user interfaces, scalable backend systems, REST APIs, RAG pipelines, AI agents, vector databases, Dockerized deployments, and CI/CD workflows. Published AI research in IJERT and presented research findings at ICTEM 2.0 International Conference.

TECHNICAL SKILLS

Programming & Core CS: Python, JavaScript, TypeScript, SQL, DSA, OOP, DBMS, Computer Networks

Full Stack Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Javascript Frameworks, FastAPI, Django, REST APIs, Authentication (JWT/OAuth), PostgreSQL, MongoDB

AI, Cloud & Tools: Machine Learning, Deep Learning, NLP, Computer Vision, Prompt Engineering, OpenAI API, Gemini API, LangChain, LangGraph, RAG, AI Agents, Multi-Agent Systems, ChromaDB, FAISS, pgvector, PyTorch, TensorFlow, Scikit-learn, Hugging Face, Docker, AWS, Git, GitHub, GitHub Actions, CI/CD, n8n

PROFESSIONAL EXPERIENCE

Python Developer Intern

WISHTML

- Developed and optimized Python-based backend services and database workflows using MySQL and PostgreSQL, batch processing, connection pooling, and automated data validation pipelines to enhance reliability and operational efficiency.
- Collaborated on backend development, REST API integration, database management, testing, and software maintenance tasks; implemented robust error handling, data quality checks, and scalable application workflows while contributing.

PROJECTS

LungCare+ – Medical AI Diagnostic Platform | ResNet-50, RAG, Docker [Live](#) | Dec 2025 – Feb 2026

- Developed a full-stack healthcare platform using React.js, FastAPI, PostgreSQL, and Tailwind CSS, enabling medical scan uploads, diagnostic report management, secure user authentication, responsive dashboards, and seamless frontend-backend communication through REST APIs.
- Integrated an AI-powered diagnostic assistant using RAG, GPT APIs, FAISS, and vector databases to deliver context-aware healthcare guidance; containerized the application with Docker, implemented GitHub Actions.

Inventory Management System | React.js, FastAPI, PostgreSQL, Docker [Live](#)

- Developed a production-ready Inventory Management System using React.js, FastAPI, PostgreSQL, Tailwind CSS, and Docker, featuring inventory tracking, product lifecycle management, customer management, order processing, stock monitoring, and interactive analytics dashboards for streamlined business operations.
- Engineered scalable RESTful APIs, optimized PostgreSQL database performance, implemented secure CRUD operations and backend business logic, and containerized the application using Docker.

AI Study Planner | Next.js, React, Firebase, Gemini API, Tailwind CSS [GitHub](#)

- Developed a full-stack AI-powered study planning platform using Next.js, React, Firebase, and Tailwind CSS, enabling personalized study schedules, task management, calendar-based planning, and real-time progress tracking through an intuitive user interface.

EDUCATION

Abdul Kalam Technical University (AKTU)

Lucknow, UP

B.Tech — Computer Science Engineering (AI & ML Specialization) | CGPA: 7.8 / 10

Sep 2022 – May 2026

* Relevant Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, Generative AI, Data Engineering, NLP, Computer Networks, Operating Systems

RESEARCH PUBLICATIONS

Published Research Paper (IJERT 2025–26): LungCare+: An AI-Driven Intelligent Doctor Recommendation System — Published research on CNN-based medical image analysis and AI-powered healthcare recommendation systems.
