PROFESSIONAL SUMMARY

Generative AI Engineer and Python Developer with expertise in AI Agents, RAG, Agentic AI, and AI Automation. Experienced in developing production-ready LLM applications using Python, FastAPI, LangChain, LangGraph, n8n, OpenAI, Gemini, Ollama, Qdrant, and Docker. Published AI research in IJERT.

TECHNICAL SKILLS

Programming & Core CS: Python, SQL, Data Structures & Algorithms, OOP, DBMS, Computer Networks

AI / ML & GenAI: Machine Learning, Deep Learning, CNNs (ResNet-50), Transfer Learning, Natural Language Processing (NLP), Computer Vision, Prompt Engineering, LLM APIs (OpenAI, Gemini, Claude), LangChain, LangGraph, Retrieval-Augmented Generation (RAG), AI Agents, Agentic Workflows, Multi-Agent Systems, HITL

Frameworks & Tools: PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, Kaggle, FastAPI, Django, FAISS, ChromaDB, pgvector, Docker, Git, GitHub, CI/CD, GitHub Actions, REST APIs, n8n, ETL Pipelines, CrewAI, AutoGen

PROFESSIONAL EXPERIENCE

Python Developer Intern

WISHTML

- Optimized 3 Python ETL pipelines processing 500K+ daily records from MySQL to PostgreSQL, reducing data transfer latency by 40% through batch processing and connection pooling. Automated Python/SQL data validation, eliminating 8+ hours of weekly QA, resolving 12+ data quality issues.

PROJECTS

LungCare+ – Medical AI Diagnostic Platform | ResNet-50, RAG, Docker [Live](#) | Dec 2025 – Feb 2026

- Fine-tuned ResNet-50 using transfer learning on 5,200 NIH ChestXray14 CT scans, achieving 92.3% validation accuracy; deployed FastAPI inference APIs with sub-200ms response latency for real-time disease prediction.
- Built a RAG-powered diagnostic assistant using GPT APIs, FAISS, and 400+ indexed medical guidelines, delivering source-cited responses for symptom queries; containerized the FastAPI + React stack with Docker and automated testing/deployment using GitHub Actions CI/CD.

Agentic AI Interview Simulator | FastAPI, LangGraph, GPT-4o, ChromaDB, Docker [GitHub](#)

- Built a real-time AI interview simulation platform, enabling low-latency conversational interviews with response times below 1.5 seconds while supporting dynamic question generation and personalized interview workflows.
- Developed a LangGraph-based evaluation agent leveraging Sentence Transformers and ChromaDB for contextual answer assessment, semantic similarity scoring, and multi-dimensional feedback generation, enabling adaptive interview experiences across role-specific question banks.

AI Resume Screening Pipeline | Gemini 1.5 Flash, FastAPI, PostgreSQL, pgvector, n8n [GitHub](#)

- Developed an AI-powered resume screening pipeline using Gemini API, FastAPI, PostgreSQL, and n8n, automating resume parsing, candidate evaluation, and role-fit analysis through LLM-powered workflows.
- Developed an AI-powered candidate matching and ranking system that evaluated criteria, generating recruiter-ready shortlists while reducing manual screening effort by 70% and improving hiring efficiency.

EDUCATION

Abdul Kalam Technical University (AKTU)

Lucknow, UP

B.Tech — Computer Science Engineering (AI & ML Specialization) | CGPA: 7.8 / 10

Sep 2022 – May 2026

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, Generative AI, Data Engineering, NLP, Computer Networks, Operating Systems

CERTIFICATIONS

Complete AI Automation & Agentic AI Bootcamp with n8n

2026

Udemy

RESEARCH PUBLICATIONS

Published Research Paper (IJERT 2025–26): LungCare+: An AI-Driven Intelligent Doctor Recommendation System — Published research on CNN-based medical image analysis and AI-powered healthcare recommendation systems.
